## **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-3 are rendered vague and indefinite for reciting terms and phrases too numerous to name individually. Examples of such language include but are not limited to:

The terms "functional water" and "raw water" are not adequately defined by the claim language or specification.

In claim 1, it is unclear if the recitation of "weight parts" is intended to be interpreted as a percent.

The claims are indefinite for reciting "aerobic bacteria and facultative anaerobic bacterial which naturally habit in the environment where humus substances exist" because the phrase fails to adequately define what bacteria are encompassed by the phrase. Applicant has failed to define what bacteria may or may not be required to decompose the composition.

The claims are generally confusing because the method steps are not clearly set forth such that one could practice the claimed invention. Specifically, the storing steps are extremely confusing in that it is unclear to what portions of the composition "the rest" refers; "a first precipitation tank" is recited however it actually appears to be a second precipitation tank; and it

is unclear what portions of the compositions are being cultivated, transferred, circulated, and/or transferred.

Claim 1 is confusing for reciting "6" because it is unclear to what this refers.

The instant claims have not been examined over the prior art because no meaningful search could be performed on the claims as drafted (with respect to relevant art) for the reasons set forth under U.S.C. 112, second paragraphs above.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Miyashita et al (US 5997717 A).

Applicant claims functional water prepared by a process.

Miyashita teaches a functional water (abstract).

Although the reference does not teach the claimed manner by which the functional water is prepared, the patentability of a product does not depend on its method of production. If the claimed product is the same or obvious from a product in the prior art (i.e. the product disclosed in the cited reference), the claim is unpatentable even though the reference product was made by

Application/Control Number: 10/519,608

Art Unit: 1651

a different process. When the prior art discloses a product which reasonably appears to be identical with or slightly different than the claimed product-by-process, rejections under 35 U.S.C 102 and/or 35 U.S.C 103 are proper. (MPEP 2113)

Therefore, the reference anticipates the claimed subject matter.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ruth A. Davis whose telephone number is 571-272-0915. The examiner can normally be reached on M-F 7:00 - 2:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Wityshyn can be reached on 571-272-0926. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
